## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6, 8, 9, 20, 29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, step (c), “unreactive” should be changed to “unreacted”. The functional group-containing compounds are not unreactive. They are reactive. It is just that they remain unreacted because they are present in an excessive proportion in the reaction.

In claims 8 and 9, the term “said third condensation polymer functional group” is unclear and thus lacks proper antecedent basis.

In claim 20, “said support” (line 3) has no clear antecedent basis.

In claims 29 and 30, “said third condensation polymer functional group” lacks antecedent basis.

### *Election/Restrictions*

3. Claims 18-30 are directed to an allowable product for reasons indicated below. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 1-17, directed to the process of making or using an allowable product, previously withdrawn from consideration

as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on October 6, 2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Allowable Subject Matter***

4. Claims 6, 8, 9, 20, 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 1-5, 7, 10-19, 21-28 are allowable over the prior art references of record.
6. Claims 6, 8, 9, 20, 29 and 30 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:

None of the prior art references of record, singly or combined, teach or suggest a coated substrate or method of making thereof, wherein the coating is a resin product of a complete condensation polymerization of an amine compound and a polyfunctional compound present. The most pertinent reference is the '250 patent (US 4,495,250) which teaches coating of an ion exchange reaction of an amine compound and polymer. However, no teaching of at least two functional groups in the polymeric compound. In addition, the method of coating does not involve polymer condensation.
